"GIHAN DISSANAYAKA",
Athmaga, Weerasinghe Rd, Puwakdandawa, Beliatla.

PROFILE

Full-stack Senior Software Engineer with 2 years of expertise in developing and optimizing multi-region enterprise applications in the travel domain. Proficient in Java, Spring-boot, TypeScript, and Angular, with a proven track record of building scalable, secure, and user-focused solutions. Adept at enhancing system performance, crafting reusable components, and delivering seamless user experiences through innovative design and development practices.

WORK EXPERIENCES

SENIOR SOFTWARE ENGINEER (Project : ERP)

Nov 2025 – Present

Zincat Technology | No. 156 1/1, Galle Road, Rathmalana, Sri Lanka

Tea ERP Platform

- Designed and developed a comprehensive tea industry focused ERP system tailored to manage business operations.
- Led the full lifecycle development and maintenance of the platform as the primary contributor, ensuring scalability, performance, and reliability.
- Integrated the ERP with Ceylon Tea Traders Association (CTTA) systems to align with regulatory and industry standards.
- Adopted a rapid "vibe coding" approach to accelerate feature delivery while maintaining code quality and consistency.

Responsibilities

- Designed and implemented full-stack features across the ERP platform.
- Collaborated directly with stakeholders to gather requirements and deliver tailored solutions
- Handled deployment workflows, repository management, and version control strategies.
- Troubleshoot and resolved production issues, ensuring system stability and performance.

Technologies:

- React, Express.js (Node.js), GitLab, GitHub, SonarQube, GitHub Copilot, Vultur, Agile Development, Rapid Prototyping, End-to-End Ownership

SENIOR SOFTWARE ENGINEER (Project : FCTG)

May 2025 – Oct 2025

CodeGen International (Pvt) Ltd | Trace Expert City, Maradana Rd, Colombo

SOFTWARE ENGINEER (Project : FCTG)

Feb 2023 – Apr 2025

CodeGen International (Pvt) Ltd | Trace Expert City, Maradana Rd, Colombo

TravelBox Enterprise

- Developed enhancements for a travel and tourism sales and distribution platform featuring advanced price formulation techniques and multi-channel sales strategies (call centers, B2B, APIs).
- Supported end-to-end product management, advanced travel packaging, and seamless integration with third-party services (GDS, channel managers, hotels).
- Ensured smooth handling of high volumes of searches and bookings.

TravelBox Central

- Contributed to migrating TravelBox setup modules into the Central web application, a comprehensive product management suite.
- Enabled advanced product-loading capabilities for contracts and setups, including accommodations, flights, rail, cruises, car hires, transfers, insurance, tours, tickets, and activities.
- Supported rate management, rules, conditions, discounts, and supplements to effectively address diverse customer needs.

Responsibilities

- Designed and implemented solutions across TravelBox platforms, enhancing global user experiences through effective testing.
- Collaborated with leads and architects on requirement analysis and solution design.
- Delivered client-focused product demos to integration teams.
- Maintained agile and Scrum best practices across 50+ sprints, ensuring on-time releases.
- Diagnosed and resolved production and client issues, improving system reliability.

Technologies

- Backend** : Java, Spring, JPA, JUnit, Mockito, Maven
- Frontend** : TypeScript, Angular, HTML
- Database** : Oracle
- Tools** : Git, GitLab, Jira, IntelliJ IDEA, Webstorm, SQL Developer, Postman, MobaXterm

SOFTWARE ENGINEER INTERN

Aug 2022 – Feb 2023

CodeGen International (Pvt) Ltd | Trace Expert City, Maradana Rd, Colombo

- Successfully completed the DEV Training Program by developing a robust online hotel booking solution.
- Gained practical experience with Agile architecture, ensuring efficient and timely project delivery.
- Acquired hands-on experience with Jira (work management), Sonar (code quality), and GitLab (repository management).

Technologies:

- Angular, Spring Boot, Java, TypeScript, CSS, SCSS.

PROFESSIONAL SKILLS

- **Back End Technologies** : Java, Spring Boot, JPA + Hibernate (ORM), Maven, Node.js (Express.js)
- **Front End Technologies** : Angular (2+), Angular Materials, React, TypeScript, JavaScript, HTML5, CSS (SCSS), Bootstrap
- **Databases** : MySQL, Oracle, MongoDB, Redis
- **Testing** : JUnit & Mockito , Integration Testing, SonarQube
- **Version Control**: - GitHub, GitLab
- **Security** : Spring Security, JWT
- **Monitoring & Logging**: Splunk
- **Other** : Agile (Methodology), Tomcat Server, IntelliJ, VSCode, Cursor, Webstorm, Atlassian Tools, Google Workspace, Microsoft Office Suite, Slack, GitHub Copilot, End-to-End Ownership

EDUCATION

Master of Science - Advanced Software Engineering
University of Westminster, UK

Following

Bachelor of the Science (Hons) of Engineering
University of Ruhuna, SL

(2017 - 2022)

PROJECTS

Kanaya

2025

Developed a product stock management and shipment tracking system for a Japanese client, primarily focusing on React frontend development. Implemented reusable components using React Query and TanStack Router to enable modern, type-safe routing. Handled dynamic CSV and PDF generation to meet business requirements and improve operational efficiency. Performed end-to-end testing with a Spring Boot backend coded in Kotlin to ensure system reliability, scalability, and maintainability.

Key Areas: *React.js, React Query, TanStack Router, Spring Boot, Kotlin*

Loan Default Prediction System

2022

Developed an AI-powered loan default prediction solution for a leading Sri Lankan financial institution. The system analyzes customer data to predict default risks and recommends optimal loan amounts based on individual profiles. Deployed on cloud infrastructure for scalability and secure data processing.

Key Areas: *Machine Learning, Data-centric AI, Cloud Infrastructure*

Travel-Guide

2021

Developed a MERN stack web application that allows users to share their travel experiences, interact with others, and manage their posts securely. The platform provides a seamless and engaging experience for travel enthusiasts. Integrated reactions and comments functionality to enhance user interaction on travel feeds and implemented backend pagination for efficient loading and display of user posts.

Key Areas: *ReactJS, Express, MongoDB, NodeJS*

ACHIEVEMENTS

- **First Runners Up:** XO-bots competition in IESL Techno Awards 2018 Organized by IESL-YMS, University of Jaffna
- **First Runners Up:** Shield of Code 2019 Hackathon Organized by IEEE Student branch University of Ruhuna
- **Second Runners Up:** SriLankan Robotics Challenge (SLRC) -2019 Organized by Electronic Club, University of Moratuwa
- **Second Runners Up:** XO-bots competition in IESL Techno Awards 2019 Organized by IESL-YMS, University of Jaffna
- **Fourth place:** Sky of Icarus 2019 Drone Competition in IESL Techno Organized by IESL-YMS, South Eastern University.
